Monarflex® Stripe Clear

Monarflex® Stripe Flamesafe

Description and Application:

The Monarflex® Stripe Clear and Flamesafe products from Icopal Plastic Membranes a/s are manufactured from the same innovative new generation of Plastomer raw materials, which characterize the entire Monarflex® product range.

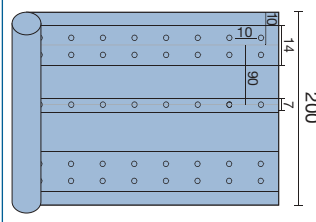

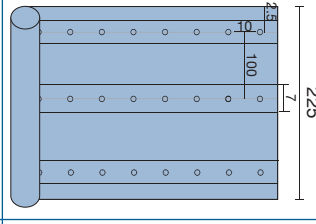

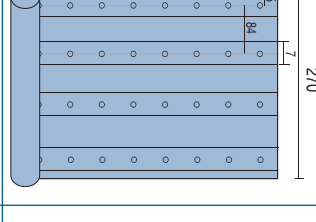

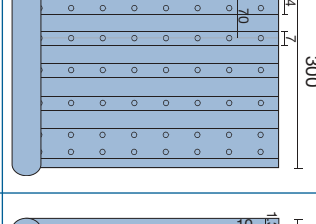

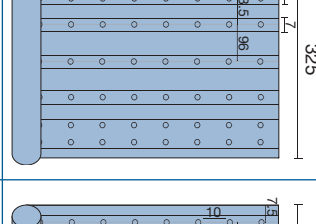

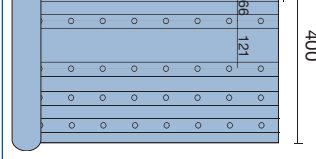

The Stripe version of these products has replaced the unique rubber eyelet fixing system with the traditional scaffband fixing. Each scaffband has pre-punched holes every 10 cm, making puncturing of the sheeting with the fixing accessory an easy task.

Like all the other Monarflex® scaffold sheeting products, the Monarflex® Stripe material includes a UV protection additive, which enhances durability and consequently increases service time.
